

**NATURAL RESOURCES CONSERVATION SERVICE
CONSERVATION PRACTICE SPECIFICATION
STRUCTURE FOR WATER CONTROL – SHORT PIPE CONDUITS
CODE 587P**

1. SCOPE

The work shall consist of the furnishing and installing of short pipe turnouts and sluices, less than 100 feet in length, as shown on the drawings.

2. MATERIALS AND DETAILS OF CONSTRUCTION

Pipe and fittings shall be made from corrugated metal, corrugated plastic, or smooth plastic pipe, and shall be installed in accordance with the following appropriate NRCS Standards and Specifications:

430-DD, Irrigation Water Conveyance,
High Pressure, Underground, Plastic
Pipeline

Interim 430-III, Irrigation Water
Conveyance, Corrugated Metal Pipeline

Interim 430-JJ, Irrigation Water
Conveyance, Corrugated, Ribbed or
Profile Wall Thermoplastic Pipe

3. MEASUREMENT

The quantity of each type and size of pipe will be determined to the nearest foot by measurement of the installed length of pipe along its centerline.
