NEW MEXICO BULLETIN NO. 450-11-01

**SUBJECT: TCH – ENERGY TRAINING COURSES FOR ALL FIELD AND
TECHNICAL SUPPORT PERSONNEL**

TO: All Offices

ACTION REQUIRED BY: SEPTEMBER 30, 2011

Purpose: To ensure NRCS Employees have basic training in energy concepts in preparation for energy resource concerns rollout.

Expiration Date: December 31, 2011

Background: In August 2010 energy was recognized as a resource concern in NRCS. GM 450-Part 409-Subpart A establishes that, “It is NRCS policy to recognize the national goal of reducing reliance on fossil fuels through energy conservation and replacement of fossil fuel-based energy with renewable energy sources. This national goal will be addressed through conservation planning technical assistance and financial assistance programs”. In order to effectively implement energy resource concerns in conservation planning all field and technical support personnel need to have at least a basic knowledge of energy principles. This basic knowledge provides a foundation for additional training and skills development. Three AgLearn sources can provide the foundation knowledge needed to prepare NRCS employees for additional training in energy planning concepts.

- 1. Air Quality, Climate Change and Energy (90 min)**
- 2. Why Do We Care About Energy? (30 min)**
- 3. Energy Basics” (90 min)**

Explanation: In order to prepare for full energy resource concerns implementation in FY-2012, all field office and technical support personnel identified on the attached list will complete the three AgLearn energy courses by September 30, 2011. The time needed to complete all three courses is estimated at 3.5 – 4 hours. The courses should be taken in the order listed above.

Action: By September 30, 2011 all field and technical support personnel identified for the training will complete the three energy courses listed above. *Those that have taken one or more of these courses within the last year do not have to repeat it but all three courses must be taken.*
