NEW MEXICO BULLETIN NO. 210-12-03

SUBJECT: ENG – NM NRCS ENGINEERING WEB SITE REMOVAL

TO: All Employees

Purpose: To notify you that the NM Engineering Web Page will be removed as of May 15, 2012.

Expiration Date: September 30, 2012

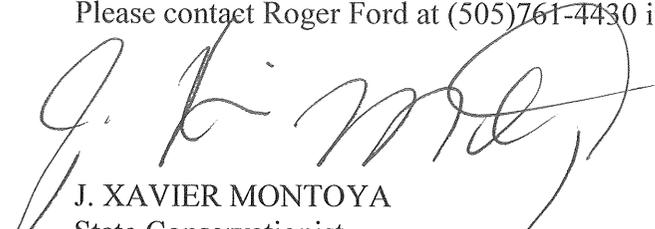

On May 15, 2012, the NM Engineering Web Page will be removed from the New Mexico Web Site. The Web Page content is out-of-date, while current tools and references (see below) are on the New Mexico Engineering SharePoint.

If you do not have access to the NM Engineering SharePoint, you need access. To get access, simply email Brenda Howard (brenda.howard@nm.usda.gov). If you have problems locating a particular document on the SharePoint, please notify Brenda Howard at 505-761-4426. Also if you have ideas on how to better present or index the information, please call or email Brenda.

Background: The information located on the Engineering Web Page is intended for the NRCS employees and not for external customers. Since early 2010, the Engineering Staff has focused its effort on placing forms, design spreadsheets, AutoCAD and ArcMap templates, and design reviews and approval on the NM Engineering SharePoint. We have let the information on the webpage become out-dated.

All information that was published to the NM Engineering Web Page has been moved to the Engineering SharePoint. In addition, the Engineering SharePoint has been reorganized to make access more intuitive and better meet the needs of area and field staff. The list of Documents (on the left side of the window) is the primary navigation tool.

Please contact Roger Ford at (505)761-4430 if you have any questions.
