National Priorities Addressed

Issue Questions	Responses
1. Will the treatment you intend to implement using EQIP result in considerable reductions of non-point source pollution, such as nutrients, sediment, pesticides, excess salinity in impaired watersheds consistent with TMDL's where available as well as the reduction of groundwater contamination or point source such as contamination from confined animal feeding operations?	Yes <input type="radio"/> or No <input type="radio"/>
2. Will the treatment you intend to implement using EQIP result in the conservation of a considerable amount of ground or surface water resources?	Yes <input type="radio"/> or No <input type="radio"/>
3. Will the treatment you intend to implement using EQIP result in a considerable reduction of emissions, such as particulate matter, nitrogen oxides (NOx), volatile organic compounds, and ozone precursors and depleters that contribute to air quality impairment violations of National Ambient Air Quality Standards?	Yes <input type="radio"/> or No <input type="radio"/>
4. Will the treatment you intend to implement using EQIP result in a considerable reduction in soil erosion and sedimentation from unacceptable levels on agricultural land?	Yes <input type="radio"/> or No <input type="radio"/>
5. Will the treatment you intend to implement using EQIP result in a considerable increase in the promotion of at-risk species habitat conservation?	Yes <input type="radio"/> or No <input type="radio"/>

State Issues Addressed

Issue Questions	Responses
1. This land is within a NMED Category I watershed?	Yes <input type="radio"/> or No <input type="radio"/>
2. Treatment of this land will enhance the benefits of an active section 319 project?	Yes <input type="radio"/> or No <input type="radio"/>
3. This contract will include a water monitoring device e.g. meter, computer panel, parshal flume.	Yes <input type="radio"/> or No <input type="radio"/>
4. An improved irrigation system will be installed, e.g. surface to sprinkler, surface to micro-irrigation, sprinkler to micro-irrigation.	Yes <input type="radio"/> or No <input type="radio"/>
5. Well or surface irrigation water usage on the contracted acres will be measurably reduced during the 2007 crop year by 10-20% when compared to the 2006 crop year.	Yes <input type="radio"/> or No <input type="radio"/>
8. Well or surface irrigation water usage on the contracted acres will be measurably reduced during the 2007 crop year by 21-30% when compared to the 2006 crop year.	Yes <input type="radio"/> or No <input type="radio"/>
9. Well or surface irrigation water usage on the contracted acres will be measurably reduced during the 2007 crop year by 31-40% when compared to the 2006 crop year. The reduced level will be maintained for the next three years.	Yes <input type="radio"/> or No <input type="radio"/>
10. Well or surface irrigation water usage on the contracted acres will be measurably reduced during the 2007 crop year by more than 40% when compared to the 2006 crop year. The reduced level will be maintained for the next three years.	Yes <input type="radio"/> or No <input type="radio"/>

Local Issues Addressed

Issue Questions	Responses
1. Has this applicant had a prior EQIP contract that was terminated due to non-compliance?	Yes <input type="radio"/> or No <input type="radio"/>
2. Select YES for only one of the following questions, 2 through 6. Will the applicant include practices that will result in a irrigation water reduction (when compared to the 2005 and 2006 crop years) of 10-15 ac/in per year for the next three years, beginning in 2007?	Yes <input type="radio"/> or No <input type="radio"/>
3. Will the applicant include practices that will result in a irrigation water reduction (when compared to the 2005 and 2006 crop years) of 16-20 ac/in per year for the next three years, beginning in 2007?	Yes <input type="radio"/> or No <input type="radio"/>

4. Will the applicant include practices that will result in a irrigation water reduction (when compared to the 2005 and 2006 crop years) of 21-25 ac/in per year for the next three years, beginning in 2007?	Yes <input type="radio"/> or No <input type="radio"/>
5. Will the applicant include practices that will result in a irrigation water reduction (when compared to the 2005 and 2006 crop years) of greater than 25 ac/in per year for the next three years, beginning in 2007?	Yes <input type="radio"/> or No <input type="radio"/>
6. Does the applicant have a current conservation plan with is being actively implemented?	Yes <input type="radio"/> or No <input type="radio"/>
7. Will the applicant convert from a surface to sprinkler irrigation system?	Yes <input type="radio"/> or No <input type="radio"/>
8. Will the applicant convert from a sprinkler to a micro-irrigation system?	Yes <input type="radio"/> or No <input type="radio"/>
9. Will the applicant convert from a surface to micro-irrigation system?	Yes <input type="radio"/> or No <input type="radio"/>
10. Will the applicant implement a RMS level conservation plan?	Yes <input type="radio"/> or No <input type="radio"/>
11. Will a flow meter be installed, if applicable?	Yes <input type="radio"/> or No <input type="radio"/>
12. Will a computer panel be installed, if applicable?	Yes <input type="radio"/> or No <input type="radio"/>
13. Will this application result in all acreage seeded to permanent cover, and remain in permanent cover for the next three years, beginning in 2007?	Yes <input type="radio"/> or No <input type="radio"/>
14. Will the applicant convert his operation from irrigated to dry crop, and remain in dry crop for the next three years, beginning in 2007?	Yes <input type="radio"/> or No <input type="radio"/>
