NEW MEXICO AIR QUALITY TECHNICAL NOTE NO. 5

SUBJECT: ECS – CROPLAND AIR QUALITY PRACTICES

Purpose: To distribute Air Quality Technical Note 5.

Effective Date: When received.

Filing Instructions: Maintained on web page.

Attached is Air Quality Technical Note 5. When planning a resource management system, an assessment of air quality resource concerns must be made and practices implemented to address those. The current tool being used by NM NRCS is the Air Quality Assessment Tool, located at: <http://www.nm.nrcs.usda.gov/technical/tech-notes/air/aq-1.pdf> . Some of the practices, which can be implemented on cropland, are summarized in this tech note.

A handwritten signature in black ink, appearing to read "George Chavez", with a long horizontal flourish extending to the right.

GEORGE CHAVEZ
State Resource Conservationist
