WOODLAND TECHNICAL NOTE NO. 23

SUBJECT: Trees For a More Livable Environment

As conservationists and Soil Conservation Service employees we will be working more in urban areas as we seek to carry out the intent of the new SCS framework plan for the future. The attached booklet will assist you in designing urban plantings. It looks at trees as a tool to use in the many steps now being taken to create a more livable environment.

When using this as a guide, pay careful attention to the hardiness zones set out on page 7 and tailor the information to your own location.
